

The Kotari

Welcome to Kotari, an architecturally designed modern home created for those who like to entertain and enjoy family life to the fullest.

The main living spaces are laid-out around a central courtyard with banks of sliding doors opening out to the area inviting the outdoors in and creating the perfect place for a sunny patio. There are also multiple living spaces so you can choose to relax in the front living room, the open-plan family room or gather on the rear patio for a family meal.

It's clear to see care has gone into creating a family-friendly home with the floorplan also featuring a rumpus room that could be used as a study and is located right off the open-plan living and dining space so it is easy to keep an eye on the kids as they play.

For the home chef, the large kitchen features plenty of bench and storage space and enjoys a central location where you can look out to the sunny courtyard, open-plan living space and over to the rumpus room.

The four bedrooms are located in a separate wing of the home for added privacy. There are three guest rooms, all with built-in robes and serviced by the main bathroom with bath and separate toilet, while the spacious master suite features an extra-large built-in robe and an ensuite with a large shower and twin vanities.

A separate laundry with plenty of built-in storage, a double car garage with a storage area and shoe rack, plus a modern and attractive exterior complete the floorplan for Kotari.
